

Documentation Guidelines for Acquired Brain Injuries (ABI)

Please provide the following documentation:

- Documentation should be on letterhead, dated and signed by a qualified professional or evaluator, e.g. identifying credentials with license number(s).
- The substantial limitation in a major life activity should be described.
- Suggestions of accommodations being recommended (i.e. extra time, frequent breaks)
- A diagnosis consistent with the most recent DSM/ICD, if appropriate.
- Documentation of the date or period of time of occurrence and diagnosis.
- Documentation of the nature of the neurological illness or traumatic event that resulted in brain injury.
- Objective (quantitative and qualitative) evidence that symptoms are associated with significant functional impairment in the academic setting. The functional impact of the brain injury must be documented by appropriate, objective measures (e.g., cognitive and academic skills, psychosocial-emotional functioning, and/or motor/sensory abilities) relevant to the academic environment.
